Is Erectile Dysfunction impacting difficulties in your life?

- Sometimes having erection problems is normal and not necessarily cause for concern. But if erectile dysfunction continues, it can be stressful, affect your self-confidence and cause relationship issues.

- If you're concerned about erectile dysfunction, talk to your health care expert.
- In other cases, medications might be needed.

About Generic Viagra Medicine

- Generic Viagra is used to treat erectile dysfunction (ED).
- The generic name for Viagra is sildenafil, and Viagra is a brand name.
- This blue pill helps to improve and maintain an erection by increasing blood flow to a specific organ.
- Many healthcare experts' prescription medicines offer these benefits and include the same active components as brand-name medicines.
- [Buy Generic Viagra online](http://onlinepillshoprx.com) is available in form of oral tablets.
- People take it in a dosage of 25, 50, or 100 milligrams (mg).

Working And Functions Of Generic Viagra Medicine

- It typically changes from one person to another.
- After 30 minutes, it largely begins to work.
- Its effects last for four to six hours.
- If your erection hurts or lasts for longer than a few hours, get medical help.

Precautions

- Eating a large meal or consuming a lot of high-fat foods before to taking this medication may reduce its effectiveness or slow down the rate at which metabolic enzymes work.
- So, it is metabolized alongside your meal, this may potentially lengthen its duration.
- Smoking or drinking alcohol can reduce blood flow to your specific organ, making it less effective or long-lasting.

The following changes may be helpful for those with erectile dysfunction:

- Eating a balanced diet
- Maintaining a healthy body weight
- Engaging in regular exercise
- Quitting smoking
- Avoiding too much alcohol and illicit drug use
- Seeking help for emotional issues
