

HVAC: Heating, Ventilation, and Air Conditioning

Are you looking for top HVAC Contractors in Surrey, BC? We provide high quality HVAC Design services in Surrey, BC at nominal rates Voltas provides mechanical designs and reviews for commercial, multi-family, and single-family units. We follow best practices to provide efficient heating, cooling, and ventilation based on your specific needs.

Experienced HVAC Contractors In Surrey, BC

Hehehe welcome to the so-called "bread and butter" of Voltas Engineering; we present to you Heating, Ventilation, and Air Conditioning – better known as HVAC.

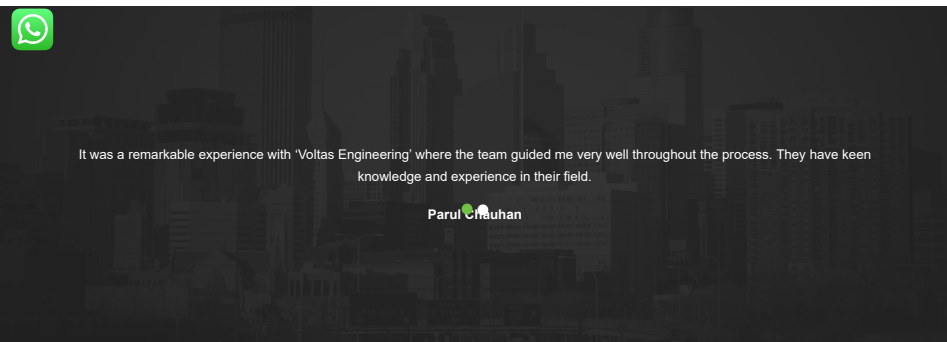

In the building and engineering world, this has become quite a trend; however, at Voltas, we know this is here to stay, and we treat it with the respect it deserves. One of the only truly multifaceted disciplines, HVAC touches on energy design, mechanical engineering performance, energy efficiency, air safety standards, and **building envelope design**. To ensure that all of those are looked after adequately in their own respective ways, Voltas is proud to have a department for each!

At Voltas, we are committed to helping you every step of the way – from the **consulting and design** stage to the implementation and blower door testing afterward, Voltas knows the ins and outs of HVAC. To further help you with the process, we are also familiar with all grants and subsidies provided by the municipal, provincial, and federal governments. This will help you save money while also ensuring supreme performance and efficiency with all your air needs. That way, you can have the heating and air conditioning you want, without breaking the bank.

As an added benefit that is difficult to find anywhere else, our departments each have their own TECA and HEPA training. Whether you are doing a home reno or completing a 200-unit townhome project, all builders can benefit from our expertise.

At Voltas, we know air. We will work with your architect and contractors to ensure the HVAC system is safe, quiet, and sustainable. Our engineers have experience in specialized building mechanical systems; this includes kitchen hoods, dust collection systems, and spray booth assemblies, and this directly results in us having the confidence to ensure you and those around you are safe and healthy.

When working with us, we make sure that all of your requests are addressed, all of your questions are answered, and all of your projects are successful. If there is anything we can do, please let us know and we will be delighted to help out. **Contact us** at 604 593 2293, or request a quote through our **online application form**.
